

SOLO STAND ASSEMBLY STEPS

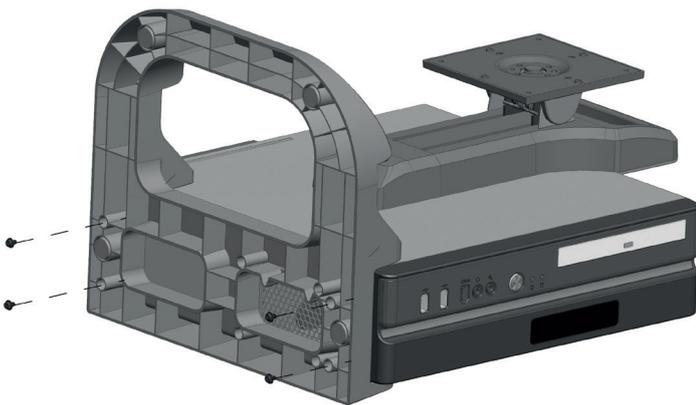

The Stone Solo Stand is supplied with all of the fixtures required for assembly, along with a tool for tightening the security screws used to attach the monitor.

Assembly will require a single cross head screw driver.

- 1 Fit Stone USFF PC onto the foot stand, ensuring alignment between the holes on the chassis and the foot stand.

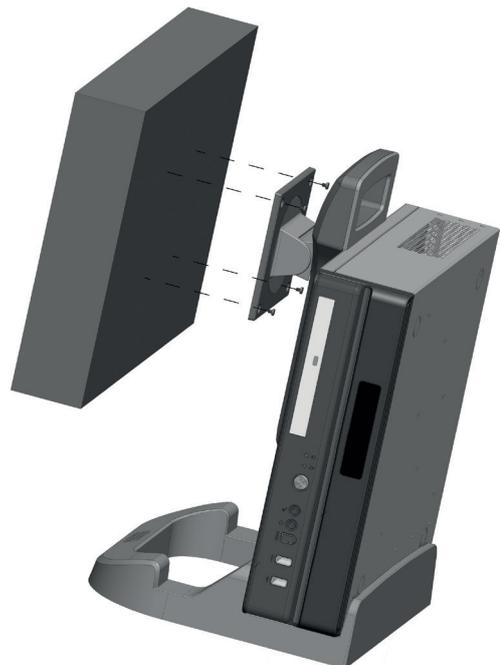

- 2 Secure the chassis and foot stand together using 4 screws (supplied).

- 3 Attach the monitor to the height adjust bracket using the supplied screws.

(Note: The monitor screws are designed to be initially thumb tightened to allow easier mounting, then locked in place with the tool which is supplied).
