INTEL® PRO WIDI QUICK START GUIDE

Launch Intel® Pro Wireless Display with the following steps:

1. In the conference room, have a Pro WiDi **certified** integrated or standalone receiver with latest firmware
2. **Launch** the WiDi application on your PC
3. Users **Connect** to the wireless display receiver according to their Windows* 7, 8.1 or 10 version
4. Users select the receiver name displayed on the monitor or display in the conference room
5. If **first time pairing** is required, user enters the **PIN displayed** on monitor
6. Once connected, users choose to project via the **Duplicate** or **Extend** mode in the Pro WiDi application
7. To end the Pro WiDi session, users click on **Disconnect** in the WiDi application on their PCs
