- Alternative Wireless Driver for all Stone Notebook / AIO systems fitted with the Intel 7260 Range [x86](#) [x64](#)

Available on Request

If you need packages for a model not listed below or on the driver finder, please contact Stone support or your account manager, as these may be available on request.

Package Notes

For SCCM system identification, the WIN32_Computer System Product string to locate your Stone system through an SCCM task is "OEGStone".

The WMI Query "WMIC ComputerSystem GET Model" will return the motherboard model as referenced by the package name, for example B85M-E.

 oegstone.b85m-e.win7x64.zip	259,049 KB
 oegstone.b85m-e.win7x86.zip	183,157 KB

Packages are available in two types - driver collections and raw driver packages which contain INF based drivers. Raw driver packages contain a text note showing which INF files need to be imported.
