

# Updating Teams Policies and Other Settings for new Microsoft School Data Sync (SDS) Users - Stone STEPER

---

## Stone Steper

STEPPER is designed to ensure that Teams Policies and user licensing is automatically configured or deployed for new users in your M365 environment. It is designed to be used in conjunction with a manual or automatic data import via Microsoft School Data Sync (SDS).

By default, is it configured to use the standard licensing group and Teams group names as deployed by Stone Computers in the Spring/Summer 2020 DFE Schools Deployment.

## Manual

[A manual is attached for Steper.](#) If you would like to use this software, please contact [support@stonegroup.co.uk](mailto:support@stonegroup.co.uk).

## Key Functionality

### Source User Groups

- All Teachers Group (from SDS)
- All Students Group (from SDS)
- Filtering Students or Teachers in those groups by Username domain i.e. myschool.co.uk

### Applying Licensing

- Applying licensing to Students or Teachers by adding them to a licensing group as required

### Applying Teachers to the All Staff Team

- Applying Teachers and the Global Admin to the Staff Team Unified Group

### Applying Students to the All Students Unified Group

### Setting the Students Department Field

- Use the SDS Grade field
- Or alternatively use the SDS Graduation field

### Applying Teachers or Students to different Security Groups

- Use a Powershell style filter to select teachers or students and add them to a security group
- Up to 100 Teacher Groups can be configured and 100 Student Groups

### Applying Teachers or Students to different Unified Groups

- Use a Powershell style filter to select teachers or students and add them to a unified group
- Up to 100 Teacher Groups can be configured and 100 Student Groups

### Applying Teams Policies Packages

- Use a Powershell style filter to select teachers or students and apply a Teams Policy Package
- Up to 100 Teacher Packages can be configured and 100 Student Packages
- Configurable thresholds for batch or immediate package processing

### Applying Teams Policies

- Use a Powershell style filter to select teachers or students and apply up to 8 of the most common Teams policies
- Up to 100 Teacher policy sets can be configured and 100 Student policy sets
- Configurable thresholds for batch or immediate policy processing

### Export Information

- Export all user Policy and Package Information
- Export all user Department Information
- Export existing Policy Jobs

### Applies to:

- [Stone Teams Policy Enforcer \(STEPPER\)](#)
